

**"...This program saved my life..."**

In order to help our clients better adapt to changing technology talent needs, we had an insight that no other firm in our industry had: technology talent of the highest caliber was coming out of the military. Highly-skilled veterans, capable of servicing the most important technology work, had the potential to produce exceptional results for the world's leading companies.

After all, the U.S. military has a reputation for excellence in nearly everything it does: from training, teamwork and operational excellence to intelligence, innovation and speed. Moreover, we understand that veterans are trained to work effectively in teams, excel under pressure, and produce results with a high degree of accountability.

#### **Teamwork**

In 2013, Sharp Decisions created the V.E.T.S.<sup>™</sup> Program to hire, train and deploy veterans to our Fortune 1000 client sites for various IT projects.

Our veterans undergo platoon-based, client-specific training in our own Sharp University.

This attention to training detail allows our veterans to hit the ground running from Day One of our client engagements, providing immediate results.

#### **Familiar terrain**

In its five-year existence, hundreds of V.E.T.S. participants have delivered critical results.

The key to this success stems from the military's most timeless principle: teamwork.

Veterans are trained to work together to create faster and better results. This is why we deploy them to clients in teams of three or more; it drives much greater efficiency for all engagements.

#### **All about your career**

This teamwork mentality is fostered inside our platoon-based training programs conducted at our own Sharp University. V.E.T.S. participants are fully salaried employees throughout the entire boot camp training. We operate our training and deployment program without any government assistance and do not touch the veterans' G.I. Bill benefits. We also offer very attractive compensation packages.

"I don't know what I'd be doing without the V.E.T.S. Program. My life has changed, and I don't think I get here without Sharp Decisions. I have a career and I know my family is taken care of, and that does a lot to reduce my other cares."

*Nick Lopez, V.E.T.S. Program Graduate, Army*
